The Coupler People®

January 2022

New Products, News,

and Information...

Made & Assembled Entirely in the U.S.A.

January Tech Tip

Kadee's website is designed to be a invaluable self help resource. Everything you need to know about Kadee® products is on the Kadee® website. We are constantly updating the site with new information as we acquire it.

See our extensive HO Scale and Large Scale coupler conversion information on our website at <https://www.kadee.com/convpl.htm>

You just need to know your make and model of your HO Scale or Large Scale car to look up the coupler conversion info.

If you can't find the information on our website you can e-mail your Kadee® questions to mail@kadee.com be sure you provide a photo of the coupler mounting if the car is not on our coupler conversion list.

The Coupler Height Gauge for the scale you are modeling is your best friend when it comes to trouble shooting, installing couplers and uncouples when used correctly. If you are trying to install couplers or trouble shoot couplers without a coupler height gauge you are just spinning your wheels. Trying to use an existing car to set your coupler heights is a bad idea and will not end well. If you think you need to bend the trip pin then your coupler is probably at the incorrect height. Trip pins are factory set and should not need to be bent if coupler is mounted correctly. When the coupler height gauge is used correctly whether for mounting uncouplers or mounting and fine-tuning couplers; your couplers should operate trouble free*. *Coupler height gauge or coupler design can't fix bad track or incorrectly setup equipment.

Clone knuckle couplers are basic copies of the Kadee® knuckle coupler design and are usually made from all plastic that can deform easily and take set. They're designed to be just a basic coupler that can connect to the Kadee® Magne-Matic® couplers; unlike their predecessor - the X2F horn hook coupler.

January 2022 New Rolling Stock!

Kadee® prides itself in creating and manufacturing premium "RTR" rolling stock as close to scale & detail as possible. Model railroaders can expect only the best quality & craftsmanship with every Kadee® quality product. Nothing stacks up to the accuracy, detail, quality, & authenticity of Kadee® Cars over all other "RTR" cars on the market.
