

#231

NET WT. 5.0 GRAMS

**Ideal for reducing friction
of moving parts
and bearing
surfaces.**

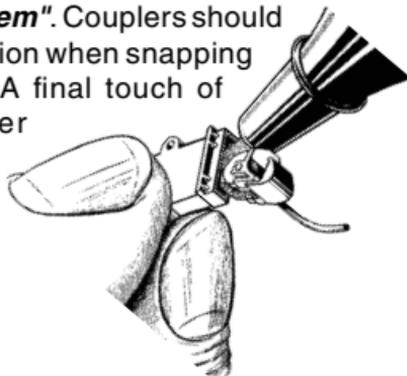

"Greas-em"

is a powered Dry Graphite
Lubricant with many uses around
the home, workshop as well as the

Highly recommended for use in all Kadee®
Magne-Matic® couplers to ensure the top coupler
performance. After proper preparation and assembly of coupler
parts (removal of flash and rough spots, and burnishing of
bearing surfaces) add a "puff" of "Greas-em" into the coupler
box and move the coupler back and forth, polishing
the inside surface with "Greas-em". Couplers should
have a "Lively" and reliable action when snapping
back to the center position. A final touch of
"Greas-em" to the coupler
knuckle head and face allows
couplers to open and offset
with less effort.
