

# #231

NET WT. 5.5 GRAMS

**Ideal for reducing friction  
of moving parts  
and bearing  
surfaces.**

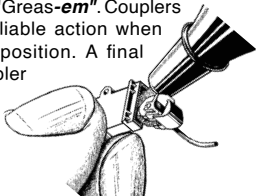

## **"Greas-em"**

is a powered Dry Graphite  
Lubricant with many uses around  
the home, workshop as well as the layout.

Highly recommended for use in all Kadee®  
Magne-Matic® couplers to ensure the top coupler  
performance. After proper preparation and assembly of  
coupler parts (removal of flash and rough spots, and burnishing  
of bearing surfaces) add a "puff" of "**Greas-em**" into the  
coupler box and move the coupler back and forth,  
polishing the inside surface with "**Greas-em**". Couplers  
should have a "Lively" and reliable action when  
snapping back to the center position. A final  
touch of "**Greas-em**" to the coupler  
knuckle head and face allows  
couplers to open and offset  
with less effort.
