NEM 363

KADEE NEM-363 COUPLER CONVERSION

There are three ways to mount Kadee® NEM-363 couplers.

1. Sliding the Kadee NEM-363 coupler in to NEM-363 Receiver on car from the bottom. Adjusting the coupler height to match the Kadee #206 coupler height gauge. (fig.1)
 2. Snapping the NEM-362 to NEM 363 adapter in the Factory NEM-362 pocket that was factory mounted at the incorrect NEM-362 height. Allowing for the Kadee NEM-363 coupler to adjust the coupler to the correct mounting height. Sliding the Kadee NEM-363 coupler in to NEM-363 Receiver on car from the bottom. Adjusting the coupler height to match the Kadee #206 coupler height gauge. (fig.2)
- Note: You may need to run one shank length shorter with this mounting option to compensate for the NEM-362 to NEM 363 adapter thickness.

3. Attach the Kadee bolt on NEM-363 adapter to the floor of the car and then slide the Kadee NEM-363 coupler in to NEM-363 Receiver on car from the bottom. Adjusting the coupler height to match the Kadee #206 coupler height gauge. (fig.3)
