Track Cleaning Car

#832 "G" Scale or #1832 #1 Scale.

Large offset coupler

Swinging gearbox

Swinging gearbox lid used as a shim

Bushing that fits track cleaner coupler mounting screw

Find the coupler bushing that fits the track cleaner coupler mounting screws.

Use the coupler shank lid on the bottom of the coupler shank to acts as the .060" shim to bring the coupler close to the correct height. I found the mounting surface on the track cleaner car is sloped downward. Filing the shim (coupler shank lid) at an angle to raise & level the coupler.

Use the Kadee coupler height gauge to check for correct coupler height make any necessary adjustments.
